```cpp
void TextBox::setFont(std::string fnt) {
    // overload function for setFont
    try{
        font.loadFromFile(fnt); // see if we can load the file
    }
    catch(...){
        std::cerr << "Cannot load font from file\n"; // if we arent able to load it
    }
}
```
