When it comes to the text editor that i am making for you,what would your be the minimum requirements ?
do you priorities the looks or speed of the program
how about features?
Kamil?

PaPaSmurf_101 Today at 22:28
I think that a text editor would be quite useful when doing some of my Alevel work. The speed of the program would not be very important but at the same time it shouldn't be so laggy making it unusable. I think it should include features like multiple commonly used fonts,ability to import your own fonts, change the colour of the text to any hue, change the size of the font, selection tool to select certain words/letters and be able to format the selected characters.

Thank you

PaPaSmurf_101 Today at 22:29
wait i have one more

rl Today at 22:29
yes

PaPaSmurf_101 Today at 22:30
I think it also would be cool if you copied code from a IDE and pasted it into the text editor and the editor would automatically format the code like keeping the indents and highlighting keywords.
*too advanced feature for NEA
xD

Thank you again
what about default colour scheme do you prefer dark mode or light mode?

PaPaSmurf_101 Today at 22:31
dark mode 💪😎
